

Viking Elementary Addition

Weekly Construction Update from Superintendent Rick Oster
Progress Report #22 1/19/24

This week in Viking the electrician was on-site installing the fire alarm devices in the music addition. We had the fluid applied flooring contractor back on-site to redo the resinous flooring in the kitchen storage room. The flooring contractor finished the vinyl composite tile (VCT) flooring around the drinking fountain. The music addition has been final cleaned as we are getting closer to turning the space over!
